

# Emergency Backpack

# MANUAL

This product is intended for adults only.

Carefully designed by safety and prepping experts, the **Emergency Backpack 17®** is made of extremely durable, lightweight and waterproof 600D TPU material, and the whole thing is closed with waterproof zippers.

Equipped with **138 proven and tested pieces of equipment**, sorted in 4 intuitively color-matched, waterproof containers.

This is the first and best such solution in the world, it is **your safety and comfort in any emergency**.

You can carry the **Emergency Backpack 17®** in the car, keep it in the closet in the hall or under the desk at work. Remember to review the contents regularly, check that everything is working, and that food, water and medications have remaining shelf life. Replace if necessary.

**When designing the Emergency Backpack 17®, we made several assumptions:**

- EXTERNAL ELEMENTS** - the outer shell of the backpack was to have as few protruding elements as possible, such as pockets, strings, elastic bands, pendants, etc., so that nothing could get caught when you need to grab the backpack and run away immediately. We've achieved it - only the arms of the backpack with a chest strap are outside, the hip belt is removable, and the outer pocket is in the flap.

- CARRIER SYSTEM** - ergonomic, with added chest and hip belts, with thickened shoulder straps, guarantees optimal weight distribution of the backpack. In addition, we put emphasis on the moment of grabbing the backpack and escaping - that's why the backpack has a reinforced handle and a second, additional handle on the back, just above the secret pocket.

- COLORS AND DESIGN** - minimalist shape, elegant appearance and gray color make the emergency backpack look like a luxurious city backpack - thanks to this you will blend in with the crowd, not attracting anyone's attention, you will be safe and you will calmly leave the danger zone.

- WEIGHT OF A BACKPACK WITH EQUIPMENT** - we have made every effort to ensure that, despite the extensive equipment of our backpacks, their weight allows you to walk for up to 20-30 km a day. Hence the light shell of the backpack and the carefully selected accessories - that's exactly what you need „just in case”. There are no gadgets or unnecessary items - everything that is in it is justified, has been tested by us and has been used for several years in our emergency backpacks.

- INTERIOR SYSTEM** - we moved away from the common mess in the backpack and created a simple, orderly system, thanks to which you can intuitively reach for the things you need. The contents of the 4 colored pouches are arranged according to their purpose. On the back, inside the backpack we have placed the Molle system, which keeps all the pouches in check - after opening the backpack and removing one pouch, the others will not fall out. Between the front flap and the pouches, we have left enough space to put on a fleece, sweater, short pants or a blouse.

- **POUCHES** - waterproof material and waterproof zippers keep the contents dry, and the reinforced side walls provide protection for the things stored in it. The convenient handle means that each pouch can be removed separately and taken to any place, exactly where you will need the things stored in it.
- **EQUIPMENT** - The Emergency Backpack 17 is equipped with 138 tried and tested elements, placed in four intuitively colour-matched pouches. The equipment has been composed in such a way as to survive for at least 72 hours from the occurrence of any disaster.
- **SECRET POCKET** - this is a place where you can put cash, a flash drive with a copy of important files or your documents; they will definitely be very safe.

## Emergency Backpack 17® Parameters:

- Capacity:** 28 liters
- Size:** height 48cm x width 32cm x depth 18
- Weight:** 0.8 kg empty backpack / 1.5 kg with trays / 8,5 kg with full equipment
- Material:** 600D TPU fabric - extremely durable, waterproof, perfectly resistant to abrasion and dirt, very light, temperature stable and environmentally friendly; used on pontoons, life jackets, swimming pools, backpacks
- External construction:** reflective elements on the shoulders, fluorescent logo, ergonomic carrying system, chest strap with emergency whistle, detachable hip belt, two handles, secret pocket, flat outer pocket.
- Internal construction:** mesh pocket for underwear on the front wall, key holder, Molle system on the back wall, 4 removable, waterproof pouches in red, blue, gray and black colours.

The equipment of the backpack is as many as **138** elements:

## Red

**51** elements of a car first aid kit compliant with the DIN 13164 PLUS standard and a first aid manual. Moreover we have equipped the first aid kit with a tactical tourniquet, sterile tactical gauze and physiological saline (NaCl). Complete this classic first aid kit with your permanent medications and medications that can help if needed.

## Gray

**29** basic hygiene items for every man and woman (9 tampons, soap, toothpaste, toothbrush, comb, shaving cream, razor, sanitary bag, cotton swabs, cotton buds, nail file, sewing kit), personal protective equipment (KN95 mask, hygienic gloves, wet wipes, hand sanitizer), a quick-drying towel, a set of safety pins, a bandana, a pack of wet tissues, a menstrual cup and a silicone cup with a cover. There is still room for spare prescription glasses or sunglasses.

## Blue

**36** items: Seven Oceans food rations for 3 days, Seven Oceans water 500 ml for the first day, energy chocolate with caffeine, rusks, foldable silicone bottle for clean water, water purification tablets, personal water filter, metal foldable cooking stove, 10 solid fuels, lighter, fire starter, steel mug, knife, metal cutlery, strong plastic bag with a capacity of 120 litres.

## Black

**19** items: 2-person emergency tent, emergency sleeping bag, raincoat with hood, 2 pieces of hand warmers, warm hat, multifunctional 5-in-1 whistle with mirror and compass, chemical light, dynamo radio with a flashlight, head flashlight, shovel, silver repair tape, 5m paracord, multitool, protective glasses - tinted, protective gloves, a reflective vest, strong carabiner, solar charger with a flashlight and a USB HUB compatible with various types of devices.

**In the outer pocket** there are **3 items**: a waterproof notebook, a pen and a Safety Brochure (in polish). This is a great place to keep a paper map of your neighborhood or the area of the evacuation site.

**Inside the backpack** you will find the Manual and the Instructions for Use of the Emergency Backpack 17 with descriptions of items - in this case it is your must-read.

### Remember!

Equipment is not everything, also skills and knowledge of how to behave in an emergency. Go to the website [www.gotowi.org](http://www.gotowi.org) and find out what threats can happen where you live, prepare for them. Make your family emergency plan, get involved in the local community, prepare your home and car well in case of emergency, read about elementary safety rules. Subscribe to the newsletter of the [www.gotowi.org](http://www.gotowi.org) portal to be up to date with our thematic articles.

# USER MANUAL

## and information about equipment

The **Emergency Backpack 17®** manual is complete as we have described each of the 130+ items of equipment in plain font so that you can read it accurately and without hassle. Information on individual items of equipment and instructions have been systematized according to their location in the backpack. We have made these efforts because we want you to use all the equipment in the **Emergency Backpack 17®** as long as possible.

The equipment of the **Emergency Backpack 17®** should be used in accordance with its intended use, in accordance with the instructions. We recommend carrying the instructions in the backpack.

The **Emergency Backpack 17®** should be inspected once a year, checking that everything is working properly or that it has not expired, replacing or repairing components if necessary. **Emergency Backpack 17®** must be ready for immediate use at all times.

In 2024, the **Emergency Backpack 17®** was distinguished and nominated for the Teraz Polska Emblem.

## Red

<b>FIRST AID KIT</b>	Inside there is a first aid kit compliant with European standard DIN 13164 PLUS, containing 46 items - full list is inside the first aid kit together with the first aid instructions. When disposing of waste from the first aid kit, remember to segregate it, keep it away from children and animals.
<b>TACTICAL TOURNIQUET TYPE CAT EMER-53</b>	Individual tourniquet, or tactical tourniquet. Precautions: The use of a tactical tourniquet has strictly defined rules. It should be remembered that when applying it to a limb, we must place it 5-7 cm above the bleeding site. If we cannot determine where the bleeding is coming from, then the rule is to place it as high as possible. It is worth mentioning that the tourniquet can be on the limb for up to 120 minutes. The time of application of the tourniquet must be marked on the tourniquet. The applied tourniquet must be clearly visible to emergency services. The tourniquet can only be removed by qualified medical personnel.
<b>TACTICAL GAUZE</b>	Sterile tactical gauze, 100% cotton, white, highly absorbent, vacuum-packed to reduce the size of the package. Application: Dressing a wound by filling it with gauze and stopping the bleeding by exerting pressure. Characterized by high absorbency. Designed mainly for packing heavily bleeding wounds, e.g. gunshot wounds, and for dressing other wounds instead of traditional gauze dressings. After removing from the vacuum package, the gauze increases its volume many times, which significantly facilitates the so-called packing of wounds (wound packing)
<b>PHYSIOLOGI- CAL SALINE</b>	3 pcs of physiological saline NACL 0.9% 5 ml, for eye rinsing or wounds.

<b>QUICK DRY TOWEL</b>	Microfiber is best washed in a washing machine at a temperature of 40 degrees, using a gentle washing program. Under no circumstances should you use bleach or softeners for this purpose. Dry at a moderate temperature.
<b>SAFETY PIN SET</b>	Safety pin is used to quickly connect two elements of fabric with each other.
<b>MENSTRUAL CUP</b>	Instructions for use are inside the menstrual cup packaging.
<b>BANDANA</b>	<p>There are hundreds of uses for bandanas, but these are important for survival:</p> <ul style="list-style-type: none"> <li>➤ Mask - After the coronavirus, most people know that bandanas can be tied as a mask. It is less effective against viruses and better against particles such as dust and pollen. You can wet the bandana to filter the smog a little better.</li> <li>➤ Bag - Tie all four corners of a square bandana together to create a makeshift bag.</li> <li>➤ First Aid - The bandana can be used as a tourniquet, first aid dressing, cold compress, eye patch, and as a scarf.</li> <li>➤ Hat - Use a bandana for sun protection around the neck, on the head, or simply as a sweatband.</li> <li>➤ Water filter - fabric can be a pre-filter for water, quickly and easily filtering out solid particles.</li> <li>➤ Marking the trails - you can mark the trails with bandanas or a bandana cut into stripes.</li> <li>➤ Fire - Cotton bandanas can be used as kindling or can be soaked in oil to create a torch.</li> <li>➤ Toilet Tissue - as a last resort, you can also use it this way.</li> </ul>

<b>SILICONE CUP WITH COVER</b>	Can be used to sterilize a menstrual cup or for drinking
<b>TAMPON</b>	A tampon does not penetrate the hymen and the only condition for using a tampon is that you have had your first period. A necessary condition is also the comfort of use, if the application causes pain and discomfort, it should be abandoned. The tampon is also the perfect kindling for fire, there are 9 pieces of tampons inside.
<b>ANTISEPTIC WIPES</b>	They contain at least 70% isopropyl alcohol, which means they are effective for disinfecting wounds and small areas of the skin. Biocidal products should be used with caution. Do not use around the eyes.
<b>PROTECTIVE GLOVES</b>	Disposable protective gloves fit perfectly to the shape of the hand, without limiting the tactile sensations. The gloves are soft and flexible, and at the same time extremely durable.
<b>COTTON BUDS</b>	They are used to clean the cavities of the auricle, only on the outside. They should not be inserted into the external ear canal to avoid injury and complications. Be careful.
<b>SANITARY BAG</b>	You can use it for the disposal of sanitary and medical waste, to be especially careful and not to pollute the environment.
<b>HAND SANITIZER</b>	Hand sanitizers can be used as a supplement or an alternative to washing hands with soap and water. Most hand sanitizers are alcohol-based and are considered more effective at killing germs than antibacterial soap. Precautions should be taken

<b>TOOTHPASTE</b>	In addition to maintaining oral hygiene, toothpaste will help us get rid of the intense smell of hands after cutting onions or processing herring. Just use toothpaste to wash your hands instead of soap. For external use.
<b>TOOTHBRUSH</b>	Used for brushing teeth, but it will also remove dirt from under the nails and cleanse joints.
<b>RAZOR</b>	Allows you to safely remove body hair. The blade is very sharp, use extreme care.
<b>SHAVING CREAM</b>	The shaving cream helps to keep the facial hair moist during shaving, leaving it softer and easier to cut. For external use.
<b>FFP2 MASK</b>	The FFP2 mask provides a similar filtration efficiency (over 94%) as masks marked N95, KN95 and P2, which can be used as anti-smog or anti-dust masks. They protect against solid and liquid particles of low and medium toxicity, incl. against air pollution, smoke, harmful dusts, dust or aerosols.
<b>SANITARY PADS</b>	They are suitable for washing wounds and for compresses
<b>NAIL FILE</b>	It is used for filing the natural nail plate.
<b>SOAP</b>	For external use only, if signs of allergy appear, discontinue use and follow your usual allergy procedure.
<b>COMB</b>	Use to comb the hair on the head and for scratching when your hand is too short.
<b>SEWING KIT</b>	It is designed for sewing.

**PROTECTIVE WIPES, MOISTENED**

Refreshing, moistened wipes are safe for the skin. Refreshing wipes are available in several pleasant scents. They are perfect for maintaining proper hand hygiene in every situation of everyday life, while traveling, on a walk and in an emergency. Convenient, small packaging means you can always have them with you. The package contains 15 pieces.

Blue

**SILICONE BOTTLE**

Collapsible silicone bottle for pure, drinkable water. A free product of Bisphenol A, with tests qualifying it for contact with drinking water.

**PERSONAL WATER FILTER**

The instructions for using the personal water filter are inside the filter package.

**WATER TREATMENT TABLETS**

Formula based on chlorine compounds. Use 1 tablet per 1 liter of water, wait at least 30 minutes after dissolving. Precautions: for external use only, hazardous to health if swallowed - irritates respiratory system and skin. Danger of eye irritation - on contact, rinse immediately with water and consult a doctor. If swallowed, contact a doctor immediately and show the packaging and / or these instructions. Keep away from children.

**FLINT**

Magnesia and magneto are connected by an orange paracord - an additional rope may be useful, and the flint is better visible. To make a fire, hold the flint over the kindling (dry moss, birch bark, needles) at an angle of 30-45 degrees, rub some magnesia and then rub the blade against the stone. Falling sparks will light a bonfire (kindling). Flint is more effective than other sources of fire, it is waterproof, durable, insensitive to rain, wind or low temperature. Flint should be handled with care and caution.

<b>COOKING MUG</b>	Made of steel, the cooking mug has a double handle for easy carrying when hot. The capacity of the mug is 350ml. Be careful when cooking in a mug.
<b>FINNISH KNIFE</b>	It is used for slicing and cutting, its handle fits perfectly in the hand and the blade is sharp. Always put the knife in the scabbard to prevent accidental injury. Be careful when using the knife.
<b>SMALL METAL STOVE:</b>	<p>The simple and stable stove is made of durable, galvanized steel. Its compact dimensions and low weight make it fit in your pocket when folded. The foldable design has an internal space for solid fuel. Two adjustable positions of the stove walls can be easily adjusted to the size of the cookware.</p> <p>How to use: Place the stove on a flat, non-flammable surface. Adjust the side walls to the cookware. Place 1 tablet of solid fuel inside the stove - if possible, do this without touching the tablet with your hands. Ignite the tablet and cook - tablets made of haximin do not smoke and ignite easily. One tablet burns for about 9 minutes, you can shorten the cooking time by increasing the number of tablets. You can easily light a tablet even in strong winds - just adjust the stove walls accordingly, and they will create a wind shield.</p> <p>After use, close the stove and store in a dry and cool place, away from strong acids. When using solid fuel tablets, take special precautions. Wash your hands thoroughly with soap and water after using solid fuel tablets.</p>
<b>FORK AND SPOON US TYPE</b>	The regular size spoon and knife, made according to the iconic American pattern, are connected by a metal loop, so you will not lose any of them. For hygiene reasons, put them in a convenient cover after use.

<b>SOLID FUEL</b>	<p>The tube contains solid fuel tablets intended exclusively for cooking in a metal stove. Made of haximin, the tablets do not smoke and ignite easily.</p> <p><b>Precautions:</b> Flammable, keep away from flames or sparks. Burning charcoal and other fuels can expose you to chemicals including carbon monoxide and soot. May cause allergic reactions through inhalation and skin contact. Solid fuel tablets and by-products are not intended for consumption. Keep solid fuel tablets away from children. Be sure to wash your hands thoroughly with soap after each contact with solid fuel tablets.</p>
<b>SEVEN OCEANS WATER</b>	The Seven Oceans Water is a recognized solution primarily used on life rafts, ships and yachts. It is also often used in classic survival and tourism, and even in tactical applications. Seven Oceans water combines a 5-year shelf life and handy form in high-quality packaging. In a 0.5-liter container made of strong aluminum foil, there are 10 sachets with 50 ml of water each. Seven oceans water is produced in Norway under the supervision of the Norwegian Ministry of Health and meets the requirements of the World Health Organization.
<b>FOIL BAG</b>	120 liters foil bag has many uses including garbage collection, separating wet and dry items, or fetching water.
<b>SEVEN OCEANS FOOD RATION</b>	The Seven Oceans Food Ration 500g is a recognized solution primarily used on life rafts, ships and yachts. It is also often used in classic survival and tourism, and even in tactical applications. It is intended to be eaten immediately after unpacking - it does not require any preparation. However, it can be poured over with hot or cold water or (if available) with milk. The calorific

value of a 500g package is 10.077kJ / approximately 2412 kcal. Nutritional values in 1 cube (one cube - 56g, there are 9 cubes in the package): caloric value 268kcal, fat 12g (including saturated 8g), trans fats - none, cholesterol - none, salt 2g, 36g carbohydrates, 4g protein.

Vitamins and trace elements: C, B1, B6, D, calcium, iron, potassium. Ingredients: wheat flour, vegetable fat, dextrose, malt, sugar, vitamins.

Allergens: May contain traces of milk and soy. Made in Norway. The use-by date is shown on the lid of the packaging.

**LIGHTER**

Always light the lighter away from your face, hair and clothing. Hold the lighter vertically and slowly press the ignition button on the top of the housing. You can adjust the flame size using the plastic regulator in the housing. Light the fire while shielding the flame from wind and precipitation. Keep out of reach of children. Improper handling of fire can cause a fire - take precautions when using the lighter.

Precautions: Do not expose to heat above 50°C. Do not allow children or mentally challenged people to use the lighter. Do not repair or modify the lighter yourself. Do not crush, pierce or throw into a fire.

**CHOCOLATE ENERGY SCHO-KA-KOLA**

The legendary German energy chocolate, proven in combat conditions. Contains natural caffeine from cocoa, coffee and kola nuts. It adds strength, improves concentration and has a great milk chocolate flavor. The scho-ka-kola is closed in a metal box with a traditional look with characteristic rays on the lid. The package contains 16 pieces of chocolate with a total weight of 100 grams.

Nutritional value of 100g of the product: energy value 2302 kJ / 533 kcal, fat 34.5 g, including saturated fatty acids 21.8 g, carbohydrates 50.7 g, including sugars 50.7 g, dietary fiber 7.3 g, protein 6.2 g, salt 0.13 g.

100g of chocolate contains as much as 200mg of caffeine! The product is not recommended for pregnant women and children. Main ingredients: cocoa 30%, coffee 2.6%, kola nuts 1.6%.

Ingredients: sugar, cocoa mass, powdered milk (18%), cocoa mass (min. 30%), coffee (2.6%), kola nuts (1.6%), emulsifiers: lecithin, flavor. May contain traces of hazelnuts, almonds, gluten and soy.

Manufacturer: Scho-Ka-Kola GmbH, Germany.

**MILITARY BISCUITS**

Original military biscuits included in Polish food rations. The perfect replacement for bread that can withstand the harsh conditions of storage and field operations. Very nutritious, they are a great addition to canned food or stews. There are six rusks in the package. A proven energetic snack for all lovers of outdoor trips and survival. Due to the fact that they are dried and hermetically packed, they can be stored for up to several years without losing their properties. The waterproof packaging means that they can be found in food supplies in all terrain conditions, be it on land or in water.

Ingredients: wheat flour, rye flour, invert sugar, vegetable fat (palm oil), glucose syrup, cumin, salt, yeast. May contain milk, eggs, soy and peanuts.

Nutritional value in 100g of the product: energy value 1616 kJ / 275 kcal, 5g fat, carbohydrates 51.4 g, protein 6g, salt 0.68 g.

Technical data: quantity in 1 package (6 rusks), net weight: 90g.

Producer: ZPC Piast, Poland

# Black

<b>MULTITOOL</b>	This multi-functional tool combines needle-nose pliers, regular pliers, wire cutters, multi-wire strippers, bottle openers, can openers, serrated knives, saws, nails, metal files with rulers, multi-function wrenches, bit adapters, Philips screwdrivers, glass breakers, and two bits. The multi-tool is foldable and comes in a durable package. The multitool has a lock and comes in a durable packaging.
<b>FOLDING SHOVEL</b>	Shovel is in a strong packaging. After unfolding, you can use it for digging, sawing or cutting, using the individual attachments of the shovel.
<b>D-RING CARABINER</b>	Made of high-quality, high-strength 7075 aluminum. The surface is anodized, never fading. D-shaped design is durable and safe. Large opening fits buckle, webbing, belt, rope etc. Additional closure protection by screwed head.
<b>RAINCOAT</b>	Made of strong PVC material, with a hood, in a large size with wide sleeves.
<b>PARACORD</b>	The Paracord rope is considered to be multi-purpose. We can use it as a shoelace, lashing, it can also be used to secure equipment or camping work. There is 5 meters of cable in the tray.
<b>REPAIR TAPE</b>	The „silver“ repair tape is perfect for quick repair of any damage and for joining various types of materials, such as torn fabrics, tents, sails, trampolines, plastic, metal, glass or sealing holes; for quick installation inside and outside.
<b>REFLECTIVE VEST</b>	According to the regulations, every person performing their tasks in a place with increased traffic must

be equipped with a reflective vest. This applies to both people leaving the vehicle in the event of a road accident, and people walking on the road on foot.

<b>CHEMICAL LIGHT</b>	Chemical light is activated by bending the plastic outer container until the glass inner container is broken (or crushed). Chemical light can last from 5 minutes (ultra intense) to 12 hours. Be careful, do not puncture or heat up.
<b>PROTECTIVE GLASSES IN A COVER</b>	Protective glasses are the basic means of individual protection, protecting our eyes against external factors while performing various activities. Safety glasses are designed to prevent any damage to the eyes.
<b>PROTECTIVE GLOVES</b>	Protective gloves are designed to isolate the hand from direct contact with chemical agents or dirty objects.
<b>HEADLIGHT TORCH</b>	Lighting sequences: the flashlight emits white and red light. You can choose the type of light by pressing the white or red button on the top of the flashlight. White light - one click of the button gives a very strong light (for 4 hours), another click gives normal light (for 10 hours), another click gives a strobe light (for 20 hours). Changing the color of the light to red is done by holding the button on the right side on the top of the flashlight for 3 seconds. Next to the button, on the top of the flashlight, there is a second button that activates the sensor - turning it on will allow to turn the flashlight on and off with a hand movement. You can turn off the sensor at any time by pressing the button on the top of the flashlight again.

**Charging**

The flashlight is charged via the USB cable, charging is indicated by a constant red light, when fully charged light turns green. The headlamp is a fully rechargeable lamp, it does not need batteries. 2.5 hours of charging is enough to use it for 20 hours of constant light.

**Before the first use**

The headlamp is about 80-90% charged, it is recommended to fully charge the device after receiving the product. Try to charge the flashlight before it runs out of power. Disconnect the cable when fully charged.

**Precautions Keep**

the flashlight away from strong sunlight. Do not try to breach the integrity of the device. Children under 6 years of age may only use the flashlight under adult supervision.

**Disposal**

You cannot dispose of electronic devices as unsorted municipal waste. Find out where you can return your used equipment. If electronic devices are discarded uncontrolled in an illegal location, hazardous substances can leak into the groundwater and then enter the food chain, damaging your life and health. The product complies with European standards and can use the CE mark.

**DYNAMO RADIO, SOLAR WITH A TORCH**

Solar and dynamo charged, with a flashlight and a small, handy powerbank. Features: 3 kinds of white LED light, FM / AM radio waves, emergency phone charging.

Before first use or after a break of more than 60 days, charge the device:

**Crank** (dynamo) - turn it in either direction for about 3-5 minutes,

**Solar** - charging time about 10-12 hours or via a USB cable from another source.

In any case, the charging indicator will glow red while charging. The flashlight is activated by the PRESS button. The radio is activated by VOLUME button - turn clockwise.

**Precautions**

Wipe clean with a soft cloth. Do not wash with detergents. The product is not completely waterproof - do not submerge it in water.

**Disposal**

You cannot dispose of electronic devices as unsorted municipal waste. Find out where you can return your used equipment. If electronic devices are discarded uncontrolled in an illegal location, hazardous substances can leak into the groundwater and then enter the food chain, damaging your life and health. The product complies with European standards and can use the CE mark.

**POWERBANK WITH BUILT-IN SOLAR PANEL AND ADDITIONAL LIGHT SOURCE**

**Technical data:** 10,000 mAh capacity, ABS case material + solar panel, Battery type lithium-polymer, LED light, Weight 300g, Size 155x82x15 mm, 5V / 1.0A input, 5V / 1.0A, 5V / 2.1A output.

**Micro USB cable** - due to the variety of devices and inputs, the pouch is additionally equipped with a cable with a splitter and terminals for all types of devices - smartphones, tablets, mp4s, cameras and other digital devices.

**Precautions**

**1.** The package heats up during charging, the power bank will gradually cool to room temperature after use or after being fully charged.

**2.** Do not use the powerbank in a closed package, with high humidity or when it is very hot, near stoves, fireplaces, open flames.

**3.** Do not expose the power bank to direct sunlight to avoid voiding the warranty.

	<p>4. The warranty does not apply and returns are not accepted in the event of damage to the internal components and the battery.</p> <p>5. The Powerbank may be used by children only under the supervision of adults.</p> <p>6. Do not soak, set on fire, crush, drop, open, puncture, damage the outer packaging, or damage the internal battery.</p> <p><b>Disposal</b> You cannot dispose of electronic devices as unsorted municipal waste. Find out where you can return your used equipment. If electronic devices are discarded uncontrolled in an illegal location, hazardous substances can leak into the groundwater and then enter the food chain, damaging your life and health. The product complies with European standards and can use the CE mark.</p>
<b>SPLITTER WITH USB CABLE</b>	The splitter allows you to charge various types of devices (with different plugs) from a power bank or other power source.
<b>EMERGENCY WHISTLE 5 IN 1</b>	This whistle is very loud (approx. 120 dB) and has many other uses - it includes a compass, communication mirror, flint, magnesium and a string.
<b>EMERGENCY TENT FOR 2 PERSONS</b>	<ul style="list-style-type: none"> <li>✔ Waterproof fabric keeps you dry, warm and helps to survive in extreme conditions;</li> <li>✔ Retains up to 90% of body heat in difficult weather conditions;</li> <li>✔ Light and compact, easy to carry;</li> <li>✔ Intended for a maximum of 2 people;</li> <li>✔ Equipped with a 120dB alarm whistle and a Paracord line;</li> <li>✔ In an emergency, the orange color will be clearly visible to rescuers;</li> <li>✔ Easy to use - unpack and use in seconds.</li> </ul>

<b>WARM HAT</b>	A hat is the perfect solution for keeping warm. When using it, remember that about 80% of heat is lost through the head.
<b>HAND WARMERS</b>	The instructions for use are on the packaging
<b>EMERGENCY SLEEPING BAG</b>	<ul style="list-style-type: none"> <li>✔ Waterproof and windproof</li> <li>✔ Prevents up to 90% heat loss</li> <li>✔ Protects against cold, rain and wind</li> <li>✔ PE tear-resistant material, coated with aluminum foil</li> <li>✔ Takes little space when folded into the cover (7cm x 5cm x 10cm)</li> <li>✔ Weighs only 110g</li> <li>✔ Easy to use - unpack and use in seconds</li> <li>✔ In an emergency, the orange color will be clearly visible</li> <li>✔ 120dB alarm whistle will increase the sense of security</li> </ul> <p><b>Precautions:</b> To avoid suffocation, never cover your face with a sleeping bag. Always put your feet in first. Children may use the sleeping bag only under the supervision of adults. It protects when the air temperature is not less than 10 degrees C.</p>

## Outer pocket in the backpack's flap

<b>NOTEBOOK</b>	An waterproof notebook will be useful when you want to write down important information or leave a message for someone.
<b>PEN</b>	You can write down your messages using the pen attached to the notebook.
<b>SAFETY BOOKLET</b>	The contents of this brochure will help you stay safe in any emergency. Read carefully (this is in polish), fill out the Family Emergency Plan yourself (you will find it on the pages of the brochure), always carry it in your backpack - in case of an emergency, you will take appropriate action.
<b>MAP</b>	A paper map of your area and the place of evacuation is very important for emergency movement. Get a map of the appropriate scale and put it in your backpack.

## A secret pocket

<b>MONEY</b>	Put a certain amount of money (e.g. 200 zlotys or more) in banknotes of various denominations, top up with coins - secure it against water.
<b>PERSONAL DOCUMENTS</b>	Make copies of your passport, ID card and driving license. Wrap in extra foil and put them in this pocket.
<b>OTHER DOCUMENTS</b>	Save on a pen drive documents confirming your professional qualifications or other rights, copies of deeds of ownership or other contracts of key importance to you. Secure with extra foil and put in this pocket.

## Packaging

The Emergency Backpack 17<sup>®</sup> is packed in a reusable, large cotton bag and then in an ecological cardboard box.

We have made every effort to ensure that the **Emergency Backpack 17®** has as little impact on the natural environment as possible. That is why a system of pouches has been created to keep equipment items in an orderly manner, without the need for additional packaging. In some cases, we used additional reusable packaging. Where it was necessary, we left plastic packaging. Dispose of used plastic packaging in containers intended for this purpose. There are many ways to reuse them. Thank you for taking care of the environment with us and thus contributing to reducing the risk of natural disasters.

**Note:**

The consequences of handling individual items of equipment not in accordance with the instructions and their improper use will not be borne by the manufacturer of the backpack, but only by its user.

**Remember!**

In addition to the equipment, skills and knowledge on how to behave in an emergency are also important. Go to [www.gotowi.org](http://www.gotowi.org) and find out what dangers may happen where you live and prepare yourself. Subscribe to the Newsletter to receive monthly portions of expert knowledge.
